

DAVID GORDON

Occupation: Councilmember / Optometrist

Burbank is facing more changes and challenges today than ever. Our quality of life, residential neighborhoods and excellent City services are threatened. Councilmembers must listen and respond to your concerns about issues like good paying jobs, attainable housing and overdevelopment.

We need transparent, common sense decision-making. We cannot keep approving projects that are too big, too dense and under parked. We need to attract and retain employers who provide good paying jobs to grow our economy. We also must address housing needs. Many people simply can no longer afford to live in Burbank like teachers, young families and seniors. To preserve our high quality of life we must train our workforce for today's jobs, repair/maintain our streets, finally address traffic issues and reduce crime.

I believe Burbank's future is bright. It has been an honor and privilege serving you as a Council member and once as Mayor. I will continue working tirelessly at the local, State and National level to protect our quality of life, improve our economy and preserve our excellent City services. I pledge to listen to your concerns, be your voice of fairness and reason on the Council, and always put the people first.
